

RAJESH R

Full Stack Developer | React.js | Node.js | NestJS | MongoDB | TypeScript

Chennai, Tamil Nadu • +91 63820 22243 • rajeshravichandrans2001@gmail.com • linkedin.com/in/rajesh-ravichandran • github.com/rajeshr62423 • rajesh-dev-mern.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of professional experience building production applications with React.js, TypeScript, Node.js, and NestJS. Core experience includes developing and maintaining modules for a custom ERP platform (React/Vite, NestJS, MongoDB) supporting multiple client implementations, with REST API design, MongoDB data modeling, and production delivery. Full-stack ownership extends to PostgreSQL/Prisma and Next.js through independently built and deployed personal projects.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend:** React.js, Vite, Next.js, Redux, Redux-Saga, React Hook Form, Formik, MUI, Ant Design, Tailwind CSS
- Backend:** Node.js, NestJS, Express.js, REST APIs
- Mobile:** React Native (Android)
- Database:** MongoDB, PostgreSQL, Prisma ORM
- Integrations & Tools:** Third-party REST API integration, Git, Postman, Jira, Vercel, Firebase
- AI-Assisted Development:** Claude, OpenAI Codex, GitHub Copilot, Kiro, Ollama

PROFESSIONAL EXPERIENCE

- Full Stack Developer — GwayIT (Gway Tech Solutions)** Oct 2024 – Present | Chennai, India
- Own module-level delivery across 6 ERP modules (CRM, Sales, Procurement, Inventory, Service, Finance) within GwayERP, a custom platform built on React/Vite, NestJS, and MongoDB, supporting multiple client implementations running in parallel.
 - Develop React.js frontend features and reusable UI components, including dynamic, configurable forms that adapt to different client workflows without duplicating code.
 - Design and implement NestJS REST APIs and MongoDB data models to support core ERP business logic end-to-end, from schema design to endpoint delivery.
 - Build configurable, client-specific workflows within shared modules, allowing a single codebase to serve varied business processes across implementations.
 - Integrate third-party REST APIs into core modules, handling authentication, data mapping, and error handling to keep downstream workflows reliable.
 - Deliver features end-to-end across frontend and backend, from development through to production release.

PROJECTS

- Seyora — Team Collaboration & Project Management Platform** Next.js, React Native, NestJS, Prisma, PostgreSQL
Live: seyora-app.vercel.app
- Built a workspace application for engineering teams to plan, track, and deliver work, backed by a NestJS REST API covering projects, tasks, and team assignment.
 - Modeled a relational schema in Prisma/PostgreSQL around a role-based workspace structure, enforcing access boundaries at the data layer, and deployed to production on Vercel.
- JARVIS — Personal AI Assistant Platform** Next.js, React Native, NestJS, Prisma, PostgreSQL, Ollama
Live: jarvis-omega-ai.vercel.app
- Built a personal assistant application layering conversational AI over user data and daily tasks, with a shared NestJS backend serving both web and mobile clients.
 - Integrated self-hosted language models through the Ollama API, secured with session-based authentication, and modeled data in PostgreSQL via Prisma.
- DigiMoiBook — Event Gift & Guest Record App** Next.js, React Native, TypeScript, MongoDB
Live: digimoibook-app.vercel.app
- Built a web application to digitize event guest, gift, and contribution records, replacing manual note-keeping with a structured, queryable system.
 - Owned the data model, interface, and production deployment on Vercel, structuring records to stay queryable per event and per guest.

CERTIFICATIONS & ACHIEVEMENTS

- Rising Star Award (2024) — GwayIT, recognized for strong performance and contribution.
- React Native Development — Certification, Udemy.

EDUCATION

Bachelor of Engineering in Computer Science — M.R.K Institute of Technology, Cuddalore | Nov 2020 – Jun 2024
